Climate change : the science, impacts and solutions / A. Barrie **Pittock**.

Language:	English
Authors:	Pittock, A. Barrie, 1938-
Publication Information:	London : Earthscan ; Collingwood, VIC : CSIRO, 2009.
Edition:	2nd ed.
Publication Date:	2009
Physical Description:	xvii, 350 p. : ill., maps ; 27 cm.
Publication Type:	Book
Document Type:	Bibliographies ; Non-fiction
Subject Terms:	Climatic **changes** Climate -- Changements
Abstract:	Summary: It is widely accepted in the scientific community that **climate change** is a reality, and is happening now rapidly. In this second edition, leading **climate** researcher Barrie **Pittock** revisits the effects that global warming is having on our planet, in light of new scientific research. **Pittock** presents all sides of the arguments about the science and possible remedies. He argues that "uncertainty is inevitable, but risk is certain". Uncertainty is not a reason for doing nothing (or merely advocating more research) but rather to evaluate and manage risk.
Contents Note:	**Climate change** matters -- Learning from the past -- Projecting the future -- Uncertainty is inevitable, but risk is certain -- What

Abstract: Summary: Water is our planet's most precious resource. It is required by every living thing, yet a huge proportion of the world's population struggles to access clean water daily. Agriculture, aquaculture, industry, and energy all depend on it - yet its provision and safety engender widespread conflict; battles likely to intensify as threats to freshwater abundance and quality, such as climate change, urbanization, new forms of pollution, and the privatization of control, continue to grow.But must
