Step 2: Spelling Suggestions

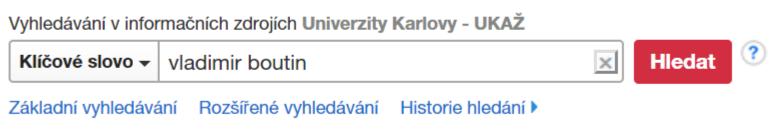

Spelling Suggestions

Nové vyhledávání

Měli jste na mysli: vladimir putin

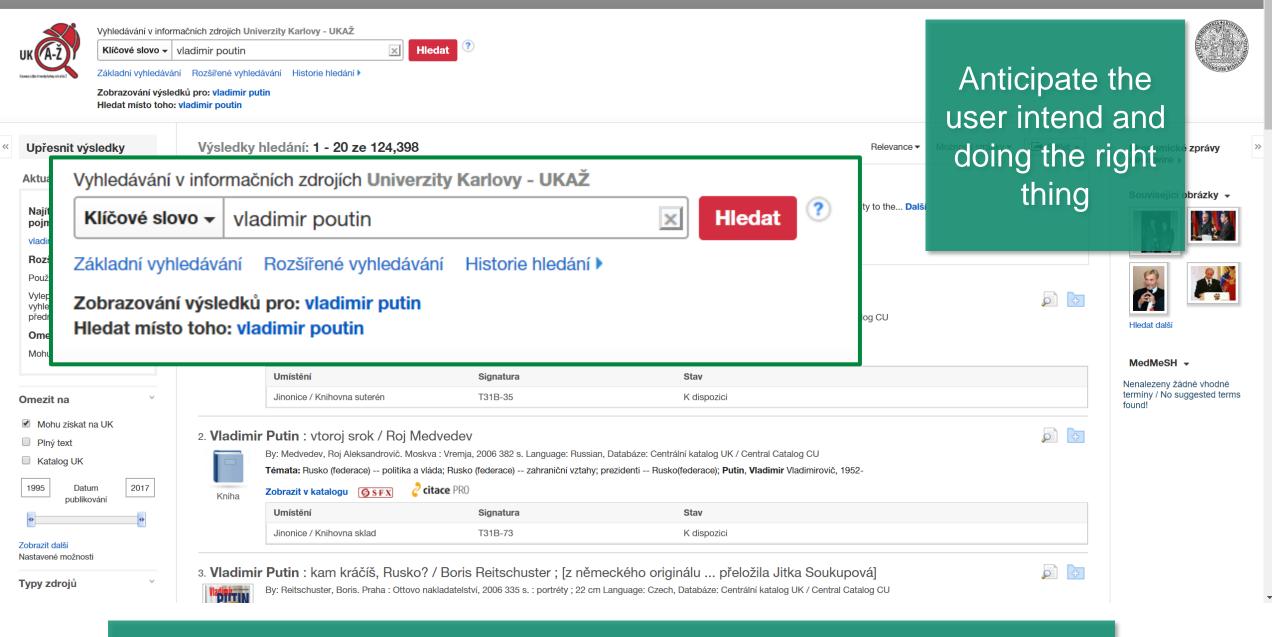

EDS started to offer improved spelling corrections, freeing itself from dictionary approaches

Step 3: Autocorrect

From few days ago available in EDS API as well

Improved Export: Export in .csv

Export Citations in .csv

- Easier export to Excel and other "databases" (etc)
- Excel = still the "Gold Standard" for large amounts of data for many users
- Frequently requested by corporations, or PhD Researchers at universities...

| Seznam výsledků Upřesnit vyhledávání | Nástroje |

EBSCO Discovery Service

A small selection of planned product enhancements

Hyperlinked Database Names

The value of hyperlinking database names

- Users will get to know specialiced subject indexes, as they are offered by the library
- Users will be able to familiarize themselvs with native user interfaced, tailored to the specific needs of a specific source, enabling them to "dive deep"
- Users can access indexes and thesauris of the individual database

October 2017: Starting with these vendors

- Alexander Street Press
- ARTstor
- EBSCOhost
- JSTOR
- HeinOnline
- Naxos Music Library
- PubMed
- Scopus
- Web of Science

Improved handling of diacritcs

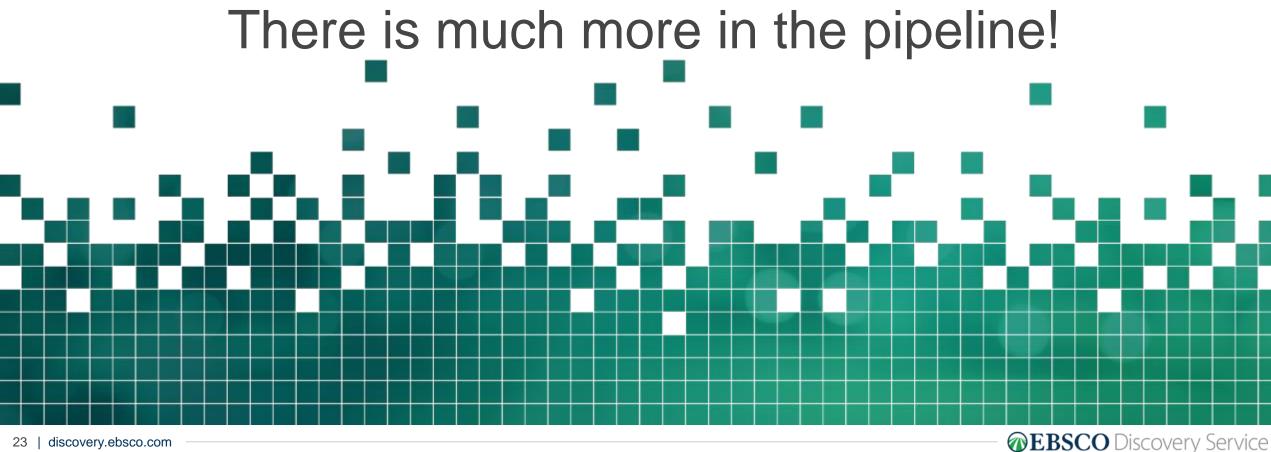

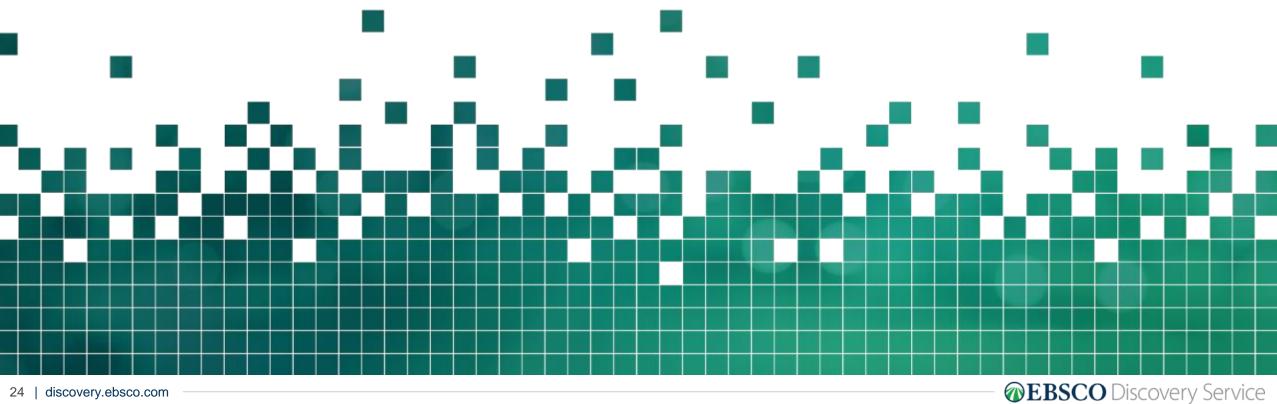

Improved handling of diacritcs

- uña (Nail) ≠ una (One)
- This will benefit every language, where diacritic marks can change meaning
 - We will be re-indexing our databases to support this
 - We are working with clients and internal testers to ensure we are getting it right!
 - It is a much tougher problem than it might appear at first

And this was only a small glimpse into what we were working on...

| | Abstract: The effect of pyrite and the role of ammonium alcohol polyvinyl phosphate (AAPP) during gold leaching in ammoniacal thiosulfate solutions were investigated using pure of pyrite catalyzed the decomposition and also significantly increased the consumption of thiosulfate. This detrimental effect became more severe with increasing pyrite contraliso substantially slowed the gold leaching kinetics and reduced the overall gold dissolution. The reduction in gold dissolution was found to be caused primarily by the sun negative effects of pyrite, however, can be alleviated by the addition of AAPP. Comparison of zeta potentials of pyrite with and without AAPP suggests that AAPP had addition and weakened the catalytic effect of pyrite on the thiosulfate decomposition by blocking the contact between the pyrite and thiosulfate anions. AAPP also competed with the cupric ion at the axial coordinate sites, and thus abated the oxidation of thiosulfate by cupric ions. Moreover, the indiscriminate adsorption of AAPP on the surface prevented the passivation of the gold surface by surface charge and electrostatic repulsion. Therefore, AAPP effectively stabilized the thiosulfate in the solution and f presence of pyrite. [ABSTRACT FROM AUTHOR] | tent.
